Programs

NEW PROGRAMS:

- Global Studies for Transfer, AA-T

Global Studies is an interdisciplinary program designed to enhance student knowledge and understanding of global processes and their implications for societies, markets, governments, cultures, and environments around the world. The program also introduces students to the study of global issues and perspectives while providing the methodological tools and techniques necessary to analyze them at multiple (local, regional, and international) levels. An understanding of the world's social, economic, political, cultural, and natural systems and their growing interdependence will not only enable students to think globally, but prepare them to live, work, and participate in an increasingly globalized world as well. The goal of the Associate in Arts in Global Studies for Transfer Degree (AA-T in Global Studies) at Irvine Valley College is to prepare students for further work in international studies and world affairs through the study of other cultures, social, economic, and political systems, world history and geography. The program is designed to encourage students to think beyond local perspectives and to think globally. Students will learn how to relate their knowledge of a particular part of the world to the larger trends and issues that affect the international community as a whole. The Associate in Arts in Global Studies for Transfer is designed to prepare students for a seamless transfer into the CSU system to complete a baccalaureate degree in Global Studies.

- Geography for Transfer, AA-T

Geography is the academic discipline which studies the earth and its people in their many mutual relationships and regional variations. Geography students examine a broad range of topics- from the physical nature of the earth's surface and atmosphere to the varied human activities which interrelate with the physical environment and result in a distinct spatial imprint on the land. Upon completion of the Associate in Arts in Geography for Transfer, students will be able to demonstrate an understanding of Earth's complex physical landscape, human activities and how they shape each other at various scales over time. The use of the "Five Themes of Geography" provide students with a framework to study these diverse human and physical landscapes and processes. As a result of its interdisciplinary nature, geography is an outstanding discipline for students who wish to integrate the physical and social sciences.

- Theatre Arts, AA

This degree offers students a broad range of specialized courses. This additional breadth is appropriate for students seeking transfer to bachelor degree programs where admission is highly competitive. All students completing this degree will take courses in six key areas: history and cultural traditions of theater, acting technique, performance procedures, stage design or stage management, production crew, and shop work. Examples of specialized coursework include vocal skills, musical theater, audio production, costume construction, stage management and contemporary theater history and criticism. By developing skills used across many forms of live entertainment, students build a portfolio of employable skills applicable to professions such as live entertainment technician, production manager, actor, singer, and dancer. Students will have the opportunity to participate in live performances on stage and as a member of the production crew. Students will spend time in the IVC theater shops learning how to build scenery and costumes. However, specific entry level employment opportunities may require additional education or experience.
